China Abrasives Manufacturers Directory 2014

--Qualified & Verified

Overall Situation

As a small industry in China's national economy and a constituent of machine tools, abrasive industry has been honored as the "Industrial teeth". Although abrasive industry only accounts for a small proportion of the whole industry structure, the role it plays is significant and indispensable. In recent years, China's abrasive industry has accomplished tremendous success, especially since the opening and reform, China's abrasive industry and superhard material industry have made astounding advances, the results are impressive: almost all major products within the industry have ranked at the forefront in the world.

Existing Problems

Despite the fact that China's abrasive industry has made huge breakthroughs in various fields, seen from the whole, there is still huge gaps between China's abrasive industry and world's developed industrial powers. iAbrasive points out that the disadvantages of China's abrasive industry mainly fall to three aspects:

1. Industry overcapacity still exists in most abrasives companies, it is especially true when it comes to corundum companies;
2. Running in the opposite direction of the Chinese government's requirements, plenty of abrasives manufacturers in China still employ production equipment that is high energy-consuming, high pollution and falls far behind advanced foreign equipment. As a result, there is still a long way to go for Chinese abrasives manufacturers to live up to the goal of energy-saving and emission reduction, namely, the low carbon economy.
3. Last but not least, shortage of competent personnel is fatal to the basic needs of industry development.

Future Prospect

According to authoritative market research, abrasive industry has an intimate relationship with certain industries and overall economic trend of different economies. For example, abrasive grains' global market value was 8.9 billion dollars

in 2011, and the figure is expected to reach 10.9 billion dollars in 2017. Therefore abrasive grains' CAGR from 2011 to 2017 is 3.4%. While abrasive products' growth is slightly faster, the global market value of being projected to reach 32.9 billion dollars in 2017 from 24.5 billion dollars in 2011, with 5.0% CAGR.

Abrasive industry serves as a powerful support for the strategic emerging high-end equipment development. With the implement of the Twelfth Five-year Plan, the Chinese government has carried out favorable policies to support the strategic emerging industry. The abrasive industry in China is bound to play its part in China high-end manufacturing industry, which may in turn contribute to abrasive industry boom.

Developing Trend

1. With the implement of energy-saving and emission reduction, labor costs have been on the rise year by year. Abrasives production equipment is in desperate need of innovation and automation.
2. Serious homogenization phenomenon exists in low-end products, which make it extremely difficult for small companies to survive. Meanwhile, abrasive industry giants have gradually come into being. Consequently, the law of the jungle will become more conspicuous in the near future of the abrasive industry.
3. With the springing up of new technologies and new materials, ordinary abrasives an abrasive products are in danger of being replaced by superhard materials and superhard products step by step.
4. The Internet has been playing an ever-increasingly important role in abrasives industry; e-commerce is exerting influence on abrasives marketing pattern subtly.

Potential Challenges

1. Price war is derived from the idea –small profits and quick returns. Many abrasives manufacturers have been involved in price war.
2. Product stability is the solid basis of a company's survival and development.
3. Developing new market is an effective way to ensure a company to maintain stable in a limited market share.
4. Rising costs and wage standards adjustment means further shrink in profit margin.
5. Energy-saving and emission reduction is a new challenge for abrasives companies.
6. When netizens and smart phone users keep renewing record, the Internet stands out as a n emerging sales channel that can effectively gain market share in the future.

iAbrasive.com has sorted out some good players in abrasive industry by market

research and information collection. Following are the basic information of outstanding companies.

Directory 2014

1. Zhengzhou Zhongyu Metallic Materials Co., Ltd.

Formally registered in 2006, Zhengzhou Zhongyu Metallic Materials Co., Ltd. is a professional manufacturer of fiberglass backing pads and epoxy resin glue. Years of experience in dealing with product production and sales has improved the company's daily capacity to 400 thousand to 500 thousand pieces of fiberglass backings. Zhongyu has established business relationships with overseas partners in one-component epoxy resin glue sales and plans to expand sales by innovation so as to provide better products and services for abrasives buyers all over the world.

Main Products: fiberglass backing, backing pad, fiberglass backing for flap disc, one-component epoxy resin glue, two-component epoxy resin glue.

Add: Miaowang Village, Xushui Town, Zhongyuan District, Zhengzhou, Henan, China (Mainland)

Tel: +86 -371 -86167220

Fax: +86 -371 -88885528

Site: <http://zhongyu.en.iabrasive.com/>

2. Henan Hengxin Industrial & Mineral Products Co., Ltd.

Founded in 1998, Henan Hengxin Industrial & Mineral Products Co., Ltd. is one of the leading suppliers in China's abrasive and refractory materials. The company focuses on a great variety of abrasive grains, including Sic, fused alumina, garnet, etc. Hengxin has always been devoted to provide customers with good-quality products that are cost-effective. The company's quality control system has passed ISO 9001:2008 certification. With fifteen years' experience, Hengxin has set up a good reputation worldwide and always seek to achieve a win-win situation via cooperation and long-term co-development.

Main Products: silicon carbide, garnet abrasive, white fused alumina, silica sand, green silicon carbide.

Add: 536R, Xinyuan, Int'l Plaza, Jianshe Road, Zhongyuan District, Zhengzhou, China.

Tel: +86 -371 -67529327

Fax: +86 -371 -67521527

3. Nantong Huixin Glass Fiber Co., Ltd.

As a member unit of Nanjing Fiberglass R & D Institute, Nantong Huixin Glass Fiber Co., Ltd. specializes in fiberglass backing pads for flap disc, fiberglass cloth for grinding wheels, fiberglass reinforced mesh for grinding wheels, etc. Huixn

has strict control over each production process and has passed ISO 9001 quality system control. Its main markets include north America, south America, Africa and Europe.

Main Products: fiberglass disc for grinding wheel, fiberglass mesh for grinding wheel, fiberglass backing pads for flap disc, fiberglass laminated tape, glass fiber disc.

Add: No.8 West Yuelong Road, RuGao Economic Development Zone, Jiangsu, China.

Tel: +86 -513 -87509247

Fax: +86 -513 -87509125

Site: <http://huixin.en.iabrasive.com/>

4. Zhengzhou Bosdi Abrasives Co., Ltd.

Located in the abrasives city—Zhengzhou, Zhengzhou Bosdi Abrasives Co., Ltd. goes global based on the favorable geographical location. Its independent brand “Bosdi” has been recognized as a famous trademark both in China and overseas abrasives buyers. The series brand includes flap disc, grinding wheel, cutting wheel and flexible grinding disc, all of which has got the MPA certification and the European Safety Standards. Bosdi is well-known for two characteristics: safety and efficiency. Positioning on high-end market, Bosdi will produce according to customer needs and provide the best products.

Add: RM.417, Baotai building, No.231, Tongbai Rd, Zhongyuan District, Zhengzhou, China.

Main Products: cutting wheel, grinding wheel, flap disc, PVA grinding wheel, diamond wheel.

Tel: +86 -371 -68611525

Fax: +86 -371 -67659918

Site: <http://bosdiabrasives.en.iabrasive.com>

5. Yichuan Dongfeng Abrasives Co., Ltd.

As a premier manufacturer of high performance abrasive grains in China, Yichuan Dongfeng Abrasives Co., Ltd. was set up in a small workshop in 1986. Starting from scratch and with years of tough efforts, Dongfeng now possesses a famous brand—"Li" and abrasive grains in 72 classification for coated abrasives and bonded abrasives. The company owns various production lines such as conventional lines, ball milled and BMK lines, a medium temperature heating line, a high-temperature heating line, a coating line, a special recombination line and a grouped abrasive grains line. Dongfeng has well over 20 years' experience in meeting the needs of customers, who are from USA, Japan, Germany, France, Korea, Italy, Thailand, and Turkey.

Main Products: brown aluminum oxide, abrasive grains, brown fused alumina, abrasive powder, brown aluminum Oxide.

Add: South of Dukang Rd, Yichuan county, Luoyang, Henan, China (Mainland)

Tel: +86 -371 -86167221

Fax: +86 -371 -65318232

Site: <http://ycdf.en.iabrasive.com/>

6. Dongtai Abrasives Co., Ltd.

Being an experienced flap disc manufacturer, Dongtai Abrasives Co., Ltd. is established in 2003. Cooperating with good material suppliers like VSM, Sanling, Kingcattle, the company's product quality is highly guaranteed. The company has

imported advanced automatic machines for production, which can not only improve quality but also make it up to the standard. Dongtai sincerely welcomes customer to visit the factory to give suggestions and recommendations.

Main Products: flap disc, sanding belt.

Add: Nianjiaozhuang Industrial Zone, Yitang Town, Lanshan District, Linyi, Shandong, China.

Tel: +86 -0539 -8439882

Fax: +86 -0539 -8439883

7. Dongguan Yuda Abrasives Technology Co., Ltd.

Dongguan Yuda Abrasives Technology Co., Ltd. has been devoted to the research and development of abrasive products for over 20 years. Committed to special profile products of coated abrasives such as chunk flap wheel, hand sticks flap wheel, cloth wheel, polishing wax, etc. Yuda is also China's largest producer of full-semi automatic flap disc machine that sell well both home and abroad.

Main Products: automatic flap disc machine, flap wheel, disc wheel, cloth wheel, polishing wax.

Add: No.592 Provincial Highway S358(near Xin'an Torii), Chang'an Town, Dongguan City, Guangdong, China, Dongguan, Guangdong, China (Mainland)

Tel: +86 -769 -82761348

Fax: +86 -769 -92761148

Site: <http://yudabrasives.en.iabrasive.com/>

8. Yichuan Shengyu Fireproof Material Co., Ltd.

The featured product of Yichuan Shengyu Fireproof Material Co., Ltd. is brown fused alumina. Shengyu possesses strong technical force, perfect quality-control system and complete detection measures to produce qualified and reliable products. Shengyu is capable of supplying brown fused alumina for various applications, including bonded abrasives (12#~240#), coated abrasives (12#~240#) and refractory materials (0-1, 1-3, 3-5, 5-8, 200).

Main Products: brown fused alumina for refractory material, brown alumina oxide for bonded abrasives, brown fused alumina oxide for coated abrasives, high-heated brown alumina.

Add: No.008, the South End of Dukung Avenue, YiChuan County, Luoyang , Henan, China (Mainland), 471300

Tel: +86 -371 -86167220

Mobile Phone: +86- 13592099888

Site: <http://shengyu.en.iabrasive.com>

9. Henan Yuxin Abrasives Co., Ltd.

The featured products of Yuxin is black silicon carbide. The annual output of black silicon carbide reaches 6000 tons, and yield of black powder amounts to 1000 tons. Owing to high stability of production, its black silicon carbide is popular in Korea, Japan and America and has obtained widely praise of clients. Yuxin Abrasives Co., Ltd has 49 sets of large equipment and 20 sets of detection device. "SINO" is Yuxin's independent trademark.

Main Products: black silicon carbide, silicon carbide for bonded abrasives, silicon carbide for coated abrasives, abrasive for grinding ball, powder.

Add: Zushi Village, Jiayu Town, Xingyang, Zhengzhou, Henan, China (Mainland)

Tel: +86 -371 -67522836

Fax: +86 -371 -67530546

Site: <http://sinoabrasives.en.iabrasive.com>

10. Qinyang Sanhui Refractory Material Co., Ltd.

Qinyang Sanhui Refractory Material Co., Ltd. has several production lines and its featured products are: Sic section sand of high purity and high bulk density, fluidized bed jet mill powder, Sic size sand and Sic abrasives grains (abrasive grains for coated abrasives/for bonded abrasives, JIS series abrasive grains). The products are of competitive price. The most striking feature of Sanhui is to produce based on customer needs. The state-of-the-art production lines and skilled staff can provide customers with all they need.

Main Products: black silicon carbide, sic powder, sic section sand, fluidized bed jet mill powder, Sic grain.

Add: Weicun, Xixiang Town, Qinyang, Jiaozuo, Henan, China.

Tel: +86 -391 -5097700

Mobile Phone: +86- 13283919622

Site: <http://sanhuisic.en.iabrasive.com>

11. Sanmenxia Mingzhu Electric Metallurgical Co., Ltd.

Located in the first dam of Yellow River--Sanmenxia hydro-junction, Sanmenxia

Mingzhu Electric Metallurgical Co., Ltd. has abundant electricity and mineral resources as well as convenient transportation. The companies has years of experience in brown fused alumina smelting and now it owns three sets of 5000KVA brown fused alumina dumping furnace, 5000KVA brown fused alumina decladding furnace. The annual output of brown fused alumina is about 45,000 to 50,000 tons. Product quality is stable, highly guaranteed and up to national standard. Its products sell well both in China and overseas market such as European and America, Japan, Korea, South Africa and many international cities.

Main Products: brown fused alumina, brown aluminum oxide, brown fused aluminum.

Add: Large Dam Sanmenxia, Sanmenxia city, Henan, China.

Tel: +86 -398 -2992059

Fax: +86 -398 -2992062

Site: <http://mzcorundum.en.iabrasive.com>

12. Coated Abrasives Sub-Association of CMTBA

Coated Abrasives Sub-Association of CMTBA is a service company whose main products and services include magazine for coated abrasives industry, advertisement design, etc.

Main Products: magazine, advertisement, magazines for coated abrasives industry, advertisement design.

Add: 121# Huashan Road, Zhongyuan District, Zhengzhou, China.

Tel: +86 -371 -67657825

Mobile phone: +86- 13937166337

Site: <http://cncaa.en.iabrasive.com/>

If you are interested in any of the abrasive companies listed above, any inquiry is welcomed. In addition, iAbrasive has recently launched a “Verified Abrasives Suppliers Page”, seeking to emphasize the difference between iAbrasive's Verified Members and unverified members in all aspects. Verified Members that have passed iAbrasive's official verification process, meaning that their company

information (business license and letter of authorization) proves to be authoritative and reliable. iAbrasive will continue to provide overseas buyers with the most accurate abrasives manufacturers' information as well as the high-quality abrasives and abrasive products they produce. As a professional platform specializes in the abrasive industry, iAbrasive will always be here, striving to provide you with the best service.
